Directive 2015/863/EU of the European Parliament and of the Council (RoHS 3)
REACH Regulation (EC) No. 1907/2006/EC

Dear sirs and madams,

to the best of our knowledge, the products we have supplied to you do not contain any substances in concentrations that prohibit their placing on the market. The relevant regulations are:

2015/863/EU - RoHS Directive

1907/2006/EC - REACH Regulation

In general, however, we are of the opinion that the products in our product range do not fall within the scope of the RoHS Directive. We are in constant contact with our suppliers regarding the obligation to provide information in accordance with Art. 33 (obligation to pass on substances in articles). According to Art. 33 of the REACH Regulation, our suppliers must provide us with information if certain substances of very high concern are contained in our product above 0.1% by mass. If we receive this information from our suppliers, we are obliged to pass it on to our customers immediately.

The coating Elastomer and Correx contain the following substance, which is included in the candidate list in accordance with Article 59(1) and (10) of Regulation (EC) No 1907/2006 REACH (<http://echa.europa.eu/>), in a concentration greater than 0.1% (6,6'-Di-tert-butyl-2,2'-methylendi-p-kresol) (CAS-Nummer: 119-47-1)

If products are intended for use in devices or machines that fall within the scope of RoHS, compliance with RoHS requirements must be contractually agreed bilaterally. This means that the order must expressly refer to RoHS-compliant materials.

This applies in particular to all products made of standard aluminum AlCuMgPb material no. 3.1645 according to DIN 1725 (old), new designation: ENAW 2007 according to DIN EN 573-1. The lead content is above the permissible limit value. The material lead was added to the list of substances of concern on 27.06.2018.

The material EN AW 6082 is mainly used.

Aluminum alloys:

AlMgSiBi	EN AW 6026 <0.4% lead	RoHs compliant
AlMgSi1	EN AW 6082 <0.1% lead	RoHs compliant
AlZnMGCu1.5	EN AW 7075 <0.1% lead	RoHs compliant
AlCuMg1	EN AW 2017A <0.1% lead	RoHs compliant
AlCuMgPb	EN AW 2007 >0.4% lead	

Please note that you may also have a duty to inform the customer.

With kind regards
NK Kunststofftechnik GmbH

Dominique Habekost
